WOODWORKING TOOLS

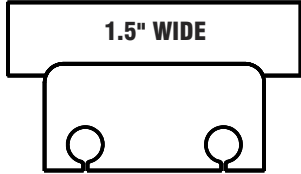

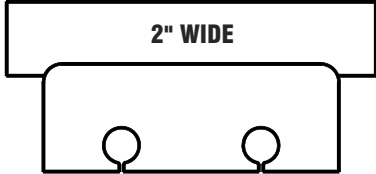

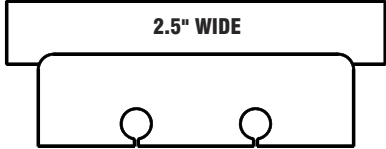

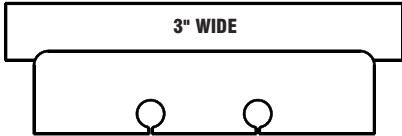

Wood-Mizer®

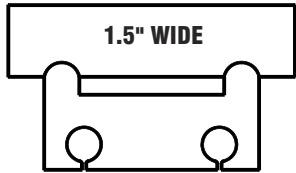

Profile Knives

Wood-Mizer profile knives are the best choice for every planing/moulding operation. Our offer starts from 4 mm thick standard profile knives produced in steel quality HSS 6% and it extends to HSS 18%, HM or other custom dimensions. The entire range of cutting tools excel the competitive products as they are carefully engineered on a dedicated software and manufactured in EDM process (Electrical Discharge Machining). As a result, the customer gets a profile knife with precisely calculated angles of cutting, not requiring any final grinding and always keeping constant parameters of work.
